

Z4-V Advanced Voice & SMS GSM Alarm Dialer

The Z4-V GSM dialer is an advanced alarm event communicator with inbuilt remote control outputs. It is most commonly used to report events from intruder alarm panels or directly from alarm sensors when used stand-alone. The Z4-V can pass on alarms via voice call or SMS to the Users or directly by Contact ID protocol to the Alarm Receiving Centre (ARC). It has 4 alarm inputs and one on/off input. Each alarm input sends a Contact ID event, pre-recorded voice or SMS separately or all at the same time to up to 10 different telephone numbers. The Z4-V has remote control outputs allowing Users to remotely control switching them by SMS, DTMF or CLIP (Caller ID).

APPLICATIONS

- Security alarm systems
- Home care and Emergency alarm
- Fire systems
- Car and boat alarm transmitter
- Door entry
- Remote access control
- Temperature regulations
- Vending Machines
- Other remote controls

FEATURES

- Built-in 3 or 4 band GSM module
- Contact ID protocol built-in
- 4 alarm inputs
- ON/OFF input
- 4 remotely controlled trouble status outputs
- 4 prerecorded alarm messages – 1 for each alarm input
- 15 SMS alarm and service messages
- Memory stores up to 10 different telephone numbers
- Listen-in function (optional)
- PC programming by USB SIM card editor
- Download programming by SMS port
- Outputs remotely controlled by SMS, CLIP and DTMF
- 80 Caller ID remote & access control users
- System activating and deactivating by SMS, CLIP and DTMF
- Up to 1000 event log buffer

TECHNICAL SPECIFICATION

Power Supply.....	13,8 - 14,5V DC
Battery backup (optional).....	12V/1,2Ah
Current consumption - peak.....	2A
Current consumption - transmitting mode.....	250mA
Current consumption - idle mode.....	40mA
Tri band GSM module (QUAD optional).....	900/1800/1900 MHz
PCB dimensions.....	105 × 80 mm
Unit dimensions - (metal enclosure).....	118 × 170 × 60 mm
Unit dimensions - IP56 box.....	155 × 220 × 82 mm
Antenna SMA.....	1
Weight (without battery).....	550g
